

## Luceco LED Lighting refurbishment for Blakemore Retail

Luceco have supplied over 10,000 high efficiency LED LuxPanels to Blakemore Retail stores throughout the UK as part of a lighting refurbishment rollout. Spar have over 12,500 stores in 42 countries throughout the world with over 2,300 outlets in the UK. Electrical and Mechanical Services Contractors, H E Barnes from Sheffield have installed LuxPanels delivering up to 50,000 hours operational life with no maintenance or re-lamping requirements. This benefits the environment in terms of energy efficiency and lamp disposal, and is the ideal lighting solution for retail environments with high volume operating hours.

Simple to install with remote 'plug and play' drivers, LuxPanels offer a unique design, the high efficiency LED panels have a completely frameless appearance and boasts a market leading efficacy of 152 lm/cw and are available in DALI dimmable and emergency options.

Circular LuxPanels were installed in promotional areas including branded fast food and delicatessen counters such as Subway franchises, or where the architecture of the building or the shop fitting structure allowed for creative lighting. Featuring slim framed panels, Circular LuxPanels offer excellent luminous uniformity and can be supplied as standard, with emergency packs or with dimmable remote drivers in 240, 180, 150 and 120mm sizes, further demonstrating the diversity of the LuxPanel range. Other commercial LED downlights from Luceco were also used highlighting specific areas of the shop floor.

“Delivering this project was smooth and to deadline thanks to Luceco’s distribution network; enabling us to install these luminaires nationwide over a wide variety of store layouts and designs. We were proud to offer Blakemore Retail Luceco Luminaires which exceeded the client’s requirements in respect to quality of product, performance, warranties, efficiencies and payback.”

Experienced Project Management Team at H E Barnes.

“The Luceco Panels are a quality product that has been partnered with quality installation provided by H E Barnes; running to deadline and surpassing our expectations every time. We have noted the increased brightness and coverage of lighting in store after installation with fewer fittings than previously used. When combining the reduced maintenance costs and improved efficiency of these luminaires, Blakemore Retail anticipates a payback on our investment in as little as 14 months.”

Dave Kyme, Blakemore Retail.
