High efficiency LED
road lantern

SLATE -
High output LED
Wall Light

It is vital that exterior luminaires direct light downwards, illuminating only the spaces required

The lighting system used at Holiday Inn Express Portsmouth North previously did not light the space evenly with illumination poor in some areas. It was important that the outdoor lighting made visitors and customers feel secure as they walked through the car park.

Urban lighting an important responsibility, which is managing light pollution. It is vital that exterior luminaires direct light downwards, illuminating only the spaces required.

Tamlite PLAZA and EXPLORER RL solutions were supplied for the project, as they are energy efficient, low maintenance, and provide sufficient illumination for staff and visitors to feel comfortable as they crossed the car park.
