MARINER -  
High integrity, coastal  
protected LED floodlight

### Efficient and low-maintenance lighting to benefit mechanics and engineers

Paynes of Hinckley is a showroom, garage and workshop, where cars are sold as well as serviced. It has a 24-hour workshop, used for cars, vans and trucks. It is important that the facilities allow their mechanics to work safely and efficiently.

Tamlite supplied EXPO fittings for the workshop and garage spaces, providing high output, efficient and low-maintenance lighting to benefit mechanics and engineers. The forecourt spaces were illuminated with MARINER urban solutions.

These MARINER fittings transformed the outdoor area, making it more secure at night, and providing a brightly lit space for customers and sales staff to view the vehicles on display. The MARINER is IP65 rated, so can withstand a range of weather conditions.
